

Indigenous Counts

The Polynesians, Andean peoples, and the Druids all kept 13 Moon counts of 28 days.

Druids Tree Count - Begins on Winter Solstice, Rhythmic Moon day 9.

Andean Pachacuti - Begins on Summer Solstice (Southern Hemisphere Winter Solstice), Crystal Moon day 23.

Lakota 13 Moon Count - Called the Keya (or turtle) count because the turtle has thirteen large scales on its back. Begins with the Calling Back of Thunder ceremony, Spring Equinox.

The thirteen moon calendar starts on July 26, whereas the other counts correspond to planetary cycles, the thirteen moon calendar begins with a galactic cycle.

The Classic Maya also began their Tun Uc (literally moon count or seven count) with July 26. The Mayan's at one time kept up to 17 different calendars simultaneously.

Note: Each of the thirteen Andean Pachacuti moons has male (A.) and female (R.) festival names

Pachacuti Calendar Year 5510 starts June 23, 2002

Druid Ógham Calendar begins Winter Solstice. December 21

Day Out of Time, New Year. Summer Solstice
(A.) Marat'aqa (R.) Watapiti. Crystal Moon day 23

Day-Out-of-Time. New Year. Winter Solstice
Rhythmic Moon 6, day 9.

- Moon 1. (A.) T'agaya (R.) Inti Raymi. Crystal Moon 12 day 24
